What does it mean? Watches, Warnings, and Advisories

Hurricane/Tropical Storm Watch: Hurricane/Tropical Storm conditions are possible within 48 hours.

Hurricane/Tropical Storm Warning: Hurricane/Tropical Storm conditions are expected within 36 hours.

Flood Advisory: Be aware of a potential weather event that could cause nuisance flooding (e.g., ponding on roads, slippery driving conditions).

Flood Watch: Be prepared for the possibility of hazardous weather. A Flood Watch is issued when conditions are favorable for flooding.

Flash Flood Warning: Take action, flooding is imminent (within 1-6 hrs) or is already occurring. Get to high ground if you're in a flood prone area.

Tsunami Advisory: Issued when a tsunami with potential to generate strong currents or waves dangerous to those in or very near the water is imminent, expected, or occurring.

Tsunami Watch: Issued by Pacific Tsunami Warning Center (PTWC) after distant earthquakes with potential to create a tsunami in Hawaii.

Tsunami Warning: Issued whenever tsunami waves have been confirmed by PTWC and/or a damaging wave is detected.

Urgent Local Tsunami Warning: Issued when a local earthquake has occurred and damaging waves are probable. Wave travel time may be as short as 10-20 minutes.

Knowing where to go and who to contact before, during, and after an emergency or disaster can make a big difference. This template seeks to give you a head start in planning. Other important considerations are the location and construction of your home, workplace, or school. To find out if you live, work, or play in a tsunami evacuation zone, visit our website at www.scd.hawaii.gov or check the disaster preparedness pages in the front of your phone book.
